

Come check out our new online venue!

**Welcome new subscribers and old hands alike
www.aviaeology.com is back**

We invite you to be among the first 100 visitors to buy directly from our new site and receive an immediate 12% off your order

Or 15% if you're really fast!

(time-limited coupon details below)

Many pre-order customers who've received them are already raving about the extensive technical details coverage in the *Docs* of our new *Canso* and *Catalina Decals 'n Docs* sets. And the decals themselves aren't half bad either.

Early feedback indicates that the new *Spitfire* set is also well received. No doubt the neat array of personal markings options is the primary reason (rather than anything we might be able to add to what's already been published on the *Spitfire Mk.VBs* technical history).

The *Docs* are nonetheless complete in their coverage of the schemes and production variations used on each individual subject aircraft.

Check 'em out... available now in 1/72 and 1/48, while larger scale sets, with the 10 subject choices split amongst *Part 1* and *Part 2*, at the printers.

Be among the first 100 visitors to make a purchase and receive 12% off the order total by using coupon code **TheLaunch100 during Checkout. Or...**

**Already know what you're looking for?
Then be one of the first 20 to Checkout using the **Speedy20**
and receive 15% off your order total**

Whichever you chose, be sure to read about bypassing the minor shopping cart checkout glitch on the **Notice Board** first though.

Yes, this is on top of the savings already offered on **select Airframe Stencil Data Markings sets** marked down their original prices for a limited time, and a **few books** marked way (way!) down on clearance.

** These coupons expire on 11 October, or when the stated number of orders threshold is reached, whichever comes first.*

For fast gen on current new releases, projects in the works at various stages, or an update on the status of delayed pre-order items, please make the **Notice Board** your first stop.

Current works in progress include a reprint run for our perennially in-demand *Beaufighter* sets in both 1/72 (thanks *Airfix!*) and 1/48 (and thank you, *Revell!*) scales. We still don't have a production-exit ETA from the printers, but the *Docs* are available for immediate download.*

For model makers looking for a single source of well-researched info to help sort out the technical details for any *Beaufighter TFX* related modelling project(s). Like most of our later *Docs*, these include bespoke illustrations that can be zoomed in to high magnification on-screen – great stuff if you use a tablet or laptop at the workbench.

Projects for which the details will be posted to the **Notice Board** at a later date include discrete sets covering certain overlooked aspects of the various *Consolidated Model 28-5 5A* subtypes (*Canso*, *Catalina*, *PBY-5* etc) and the various flavours of *Beaufighter TFX*.

More later... thanks as always,
Alison and Terry @ **SkyGrid Studio / Aviaeology Publishing**

** All Docs-only purchases are refunded if you purchase the related Decals 'n Docs sets directly from our site at a later date.*
