Duke Hawkins

#9

Harrier &

Foxhound

For our next two books, we've chosen a pair of truly spectacular jets: One is the worlds **most successful VSTOL jet fighter**, while the other is currently **the fastest military aircraft operational**. Book 11 in the Duke Hawkins series is a 140 page reference on the **Harrier II**, while book 12 covers the **Mikoyan MiG-31 Foxhound**!

Harrier II: over 350 photos packed in 140 pages !

The Harrier II book portrays not only the RAF and RN Harrier GR7 and GR9, but gives you also a close-up view of the AV-8B Harrier II Night Attack and radar-equipped Harrier II Plus.

The MiG-31 book is the first one published to offer a very close look at the Russian supersonic interceptor

MiG-31 Foxhound: over 250 unique photos packed in 108 pages !

Make sure to keep your collection complete with this new book.

Harrier II

Available from March 27, 2020

A complete portrait

For this book on the Harrier II, we assembled an incredible amount of photos; the RAF/Royal Navy Harriers were photographed in great detail, while we visited the Spanish Aircraft Carrier Juan Carlos I to photograph the radar-equipped EAV-8B up close. On top of that, we included photos taken in the US of both the AV-8B Harrier II Plus and Night Attack Harrier.

Action photos were made by former Harrier pilots, in Afghanistan and on board of RN aircraft carriers. This 11th book in the series has 140 pages and packed with over 350 never before published photographs. It took us quite some time to get it finished and we had a lot of fun working on it! We've got the entire jet in real close-up, including the cockpit, landing gear bays and as usual, the aircraft in maintenance.

Only 25 Euro !

Action and close-up!

The Harrier II is a versatile jet with incredible capabilities. We show it in every detail and point out the differences between the versions. The BAE Systems Harrier GR7, GR9 and two-seater T.12, as well as the AV-8B Night Attack and Harrier II Plus.

Details include the air intake, movable nozzles, refuelling probe, vertical tail, wings, speed brake, radome, landing gear and more. Like in our other books, we also have a maintenance chapter in this book, showing just about everything.

About 14 pages of cockpit photos are included, both of single seat and two-seat versions. And we include some additional photos of the ejection seat out of the aircraft. Ideal for modellers!

Russian power

MiG-31 Foxhound !

Our newest book in the Duke Hawkins series is the first to give you a close-up look at the Mikoyan MiG-31 Foxhound, the fastest operational jet in the world, capable of flying at speeds of up to 3.000 km/h!

This 50 ton interceptor was photographed in detail from every possible angle, in action on the ground and in the air! Never before seen details are included in this 108 page book, containing some 250 high resolution photographs of Foxhounds from Russia and Kazakhstan.

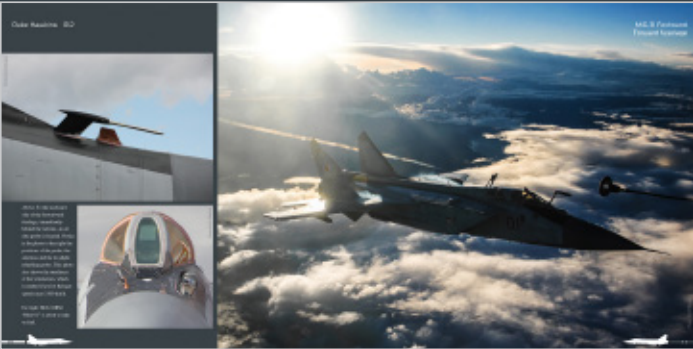

This book includes detailed photos of long range R-33 and mid-range R-40 missiles.

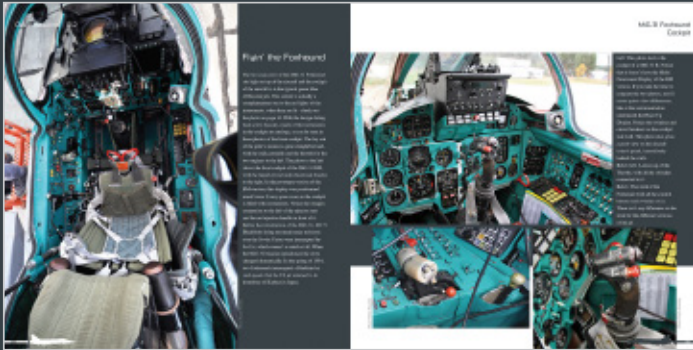

The MiG-31 is used in some of the most extreme conditions. We even show you action of the interceptor operating over the North Pole.

Available from March 27, 2020

Fast, rugged, robust, operational in every imaginable weather condition. This book includes some of the most fantastic photos of Kirill Mushak, who lives near one of the airbases from which the MiG-31 Foxhound operates.

Never before seen details of the air intake, exhausts, landing gear, vertical tails, wings, speed brakes and much more. Not only does this book offer you photos of the landing gear, but also of the wheel bays and the fuselage missile rails .

The typical cockpit of the Foxhound is included in great detail. Both the B version and the modernised MiG-31 BM are included! And so much action !!
