

Warning Star On Approach!

Dear friends,

A strictly limited edition of 1,000 C-121 "Warning Star" kits by Plusmodel is coming!

All the injected parts are provided by Heller but hey, it's not just a rebox! The plastic stuff comes with:

- New step-by-step instructions
- Decals for 4 versions, stencils and walkways included
- New resin highly detailed engines
- A PE fret with aerials

The kits should hit the shelves at the end of May or in June 2014. The price has not been set yet and we will keep you informed.

Kind regards,

Plusmodel Team
