Here are photos of Wojtek's latest models. He has also produced an accessory pack to go with the Shed Ju 52 with the correct engines and undercarriage for the civil versions. Available for £5 when bought with the kit and decals.

Danny Samuels has kindly sent in some photos of some of his collection

Jean Pierre Cottu has been producing yet more superb models using the reasonably priced silver plated models from Atlas. Jean Pierre removes the silver plate to reveal the pink alloy below. I have been trying to turn a Superfreighter from the same series into one that would have been used by the RAF in the Suez crisis. Silver City machines were earmarked and registrations issued but not taken up. My first attempt ended when the primer came off in sheets. I then cleaned the model with meths and used cotton gloves to handle to remove all grease. So far so good.
